

Invitation

Dear colleagues,

The tight regulation of cell motility is crucial for proper embryonic development and adult tissue homeostasis. Aberrant activation of embryonic signaling pathways controlling cell motility enables cancer cells to invade foreign tissues. Furthermore, the establishment of a specific tumor microenvironment contributes to successful tissue invasion and metastasis of malignant cells.

In the SFB 850, developmental biologists, basic and translational cancer researchers as well as clinicians joined forces to study the mechanisms underlying cellular motility. During the forthcoming 2nd International Symposium *Control of Cell Motility in Development and Cancer*, participants and world-renowned experts will discuss the current state of the art in this exciting field of biomedical sciences.

On behalf of the organization committee, I cordially invite you to participate in our symposium.

There is no registration fee, however, please register at www.sfb850.uni-freiburg.de.

Sincerely yours,

Christoph Peters
(Coordinator SFB 850)

2nd INTERNATIONAL SYMPOSIUM Control of Cell Motility in Development and Cancer

Invitation
and program

March
11-13, 2015

Location:
Lecture Hall
Otto-Krayer-Haus
Albertstr. 25
79104 Freiburg

Registration and program
www.sfb850.uni-freiburg.de

Registration and program

DFG Deutsche
Forschungsgemeinschaft

Wednesday, March 11th

14.00 h	Registration
16.00 h	Opening of the meeting (Christoph Peters)
16.05 h	Session I Cell motility in development (Chair: Sebastian Arnold)
16.05 h	Darren Gilmour (Heidelberg) Collective cell biology of tissue migration
16.35 h	Wolfgang Driever (Freiburg) Control of cell adhesion and motility in the early zebrafish gastrula
17.05 h	Klemens Rottner (Braunschweig) Molecular regulation of cell protrusion and migration
17.35 h	Coffee Break
18.00 h	Toma Yakulov (Freiburg) The role of the cancer-associated adhesion molecule EpCAM in collective cell migration and repair
18.30 h	Stefano Piccolo (Padua) YAP/TAZ and stem cells

19.00 Reception

Thursday, March 12th

9.00 h	Session II Tumor microenvironment (Chair: Robert Zeiser)
9.00 h	Burkhard Becher (Zürich) Interleukin 12, a new/old tumor suppressor
9.30 h	Thomas Reinheckel (Freiburg) Lysosomes and lysosomal proteases contribute to shape the tumorigenic microenvironment
10.00 h	Patrick Michl (Halle) Transcriptional networks in the tumor-stroma crosstalk as modulators of tumor progression and metastasis
10.30 h	Coffee Break
11.00 h	Alana Welm (Oklahoma City) Mechanisms of breast cancer metastasis - interplay between tumor and host

11.30 h	Anna-Katerina Hadjantonakis (New York) Cell intercalation as a mechanism driving endoderm morphogenesis in the mouse embryo
12.00 h	Jörn Dengjel (Freiburg) Deregulated microenvironment of cancer associated fibroblasts
12.30 h	Rama Khokha (Toronto) Global regulation of microenvironment through TIMP deletion
13.00 h	Lunch Break
13.30 h	Poster session with coffee
16.00 h	Session III Cell movements in the epithelia (Chair: Tilman Brummer)
16.00 h	Cédric Blanpain, (Leuven) Mechanisms regulating tumor heterogeneity and malignant progression in skin squamous cell carcinoma
16.30 h	Claus-Werner Franzke (Freiburg) Shedding of transmembrane collagen XVII regulates cell proliferation & motility during epidermal regeneration and carcinoma invasion
17.00 h	Hana Andrlova (Freiburg) The role of biglycan in melanoma metastasis
17.30 h	Coffee Break
18.00 h	Andreas Hecht (Freiburg) Transcriptional silencing of tumor suppressor genes by enhancer decommissioning provides new insights into the disruption of regulatory circuits in colorectal cancer
18.30 h	Holger Kalthoff (Kiel) Role of nuclear TRAIL-receptors in invasion and metastasis

Friday, March 13th

9.00 h	Session IV Carcinoma progression (Chair: Thomas Reinheckel)
9.00 h	Jos Jonkers (Amsterdam) Conditional mouse models of invasive lobular breast carcinoma

9.30 h	Thomas Brabletz (Erlangen) Cellular plasticity in cancer: driving force and therapeutic target
10.00 h	Jing Yang (San Diego) Epithelial-mesenchymal plasticity in carcinoma metastasis
10.30 h	Coffee Break
11.00 h	Jochen Maurer (Freiburg) Targeting cancer stem cells from triple negative breast cancer with differentiation therapy
11.30 h	Laura Machesky (Glasgow) Role of the actin cytoskeleton and invadopodia proteins in invasion and metastasis of pancreatic cancer
12.00 h	Tilman Brummer (Freiburg) B-Raf inhibitors induce epithelial differentiation in BRAF mutant colorectal cancer cells
12.30 h	Arndt Hartmann (Erlangen) Bladder Cancer - Molecular markers in prediction of therapy response and prognosis
13.00 h	Lunch Break
15.00 h	Session V Transcriptional and epigenetic programs controlling EMT (Chair: Christoph Peters)
15.00 h	Simone Fulda (Frankfurt) Novel opportunities for targeting cell death pathways in cancer
15.30 h	Gerhard Christofori (Basel) Transcriptional control and cell plasticity during EMT and malignant tumor progression
16.00 h	Roland Schüle (Freiburg) Lysine-specific demethylase 1 (LSD1) controls migration and invasion
16.30 h	Coffee Break
17.00 h	Introduction to Dr. Robert A. Weinberg
17.05 h	Keynote lecture Robert Weinberg (Cambridge) Cancer stem cells and the mechanisms of malignant progression
18.05 h	Final remarks (Christoph Peters)
19.30 h	Speakers' Dinner
